Your in-house decorations **expert**

# Apparel decoration and embroidery design software

Whether you're adding embroidery to your range of apparel decorations, or starting an embroidery business, DecoStudio is the perfect place to set your anchor stitch. Wilcom's renowned stitch technology integrated with CorelDRAW Graphics Suite X6, makes DecoStudio the easiest way to create stunning embroidery, printing, laser cutting, rhinestone designs and more!

## Graphics to stitch conversion – enhanced!

DecoStudio lets you convert any vector art into embroidery, appliqué or bling. Just point it to a vector file and the Wilcom's stitch engine intelligently generates the best stitching for the type of design and the fabric it will be embroidered on. Enhance or edit as you like.

## Edit your designs with ease

DecoStudio provides you with true object-based editing to refine embroidery designs as needed. Edit embroidery in the same way you adjust vector files as well as change colors, stitch types and remove small stitches automatically.

## What others have to say...

"DecoStudio has helped us to offer a service that no other gift store in Seattle is doing. We would rate Wilcom 5 out of 5 for the entire experience."

M. THOMAS

## Easy multi-decoration design

With CorelDRAW integration, the options are endless for creating brilliant, all-purpose designs. Create designs layered with print, embroidery, appliqué, and rhinestones and export them to the required file formats for production.

## Visualize designs on actual garments

Choose from more than 50 product templates to help preview and share your vision of how designs will appear on different garments. Not only are these worksheets useful for the production team, but you can also create an Approval PDF to help speed up the approval process.

"DecoStudio is great and I am now able to digitize artwork so quickly that I am getting new jobs right and left... buying this software was the best decision I have made."

R. MITCHELL

## Embroidery Lettering & Monograms

Wilcom is famous for quality lettering. Use any of the 165 pre-digitised fonts for speed, precision and no thread breaks! You can also convert any True Type fonts with ease. Monograms are easy with DecoStudio – choose a style, add borders and motifs for quick personalized giftware.

## Auto Appliqué – enhanced!

Create striking appliqué designs with DecoStudio. Simply tag the vector image you want and the Auto Applique tool automatically builds the tack-down, base and finishing stitches your machine requires. You can now also visualize the finished effect by previewing the appliqué with your selected fabric.

"The software is very user friendly and much easier to use than some of the other programs that I have tried. It is a good feeling to know that there are folks that are ready to help whenever you need them."

M. CHASTAIN

## Auto Fabrics for best stitch results – enhanced!

Have the best-practice embroidery settings for underlay, pull compensation and stitch density settings automatically applied based on your chosen fabric. Whether you're working with fleece, pique or cotton, the stitching is automatically adjusted to suit.

## Add as you grow with Elements

When you need more specific capabilities, simply add Elements to DecoStudio. Add one, some, or all of them: that way, you pay only for the functionality you use.

Light up your designs with Bling! Convert vector designs into rhinestone shapes, runs and patterns.

Digitally print high resolution embroidery TrueView simulation to offer your customers alternative decoration effects.

Quickly create borders around multiple objects when creating sports logos and badges.
